

ANSH

Data Analytics and Machine Learning Candidate | Python • SQL • Business Intelligence | 100% Tuition Fee Waiver Scholar

Gurgoan | 9034637401 | nextrgenansh@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Providing end-to-end data-driven solutions to complex business challenges by translating business requirements into analytical frameworks, building scalable data pipelines and predictive models, and delivering actionable insights through compelling visualizations that drive strategic decision-making | [100% Tuition fee Scholar](#) | [National-Level Exhibition Representative](#) | [Portfolio](#)

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, SciPy, ETL, Data Ingestion, Data Validation, Automated Data Pipelines

Database & SQL: MySQL, SQL Joins, GROUP BY, HAVING, CTEs, Subqueries, Window Functions

Machine Learning & Deep learning: Scikit-learn, TensorFlow, Keras, Model Training & Testing, Supervised & Unsupervised Learning, Neural Networks, CNNs, Model Evaluation, Hyperparameter Tuning, ML Pipelines, Model Deployment, MLOps

Statistics: Descriptive Statistics, Correlation Analysis, Regression, Hypothesis Testing, A/B Testing, Normality Testing, Train-Test Split, Model Evaluation

Analytics & Visualization: EDA, Statistical Analysis, Data Cleaning, Missing Value Treatment, Outlier Detection, Matplotlib, Seaborn, Plotly, Power BI, ydata-profiling

Cloud, DevOps & MLOps: AWS (ECR, ECS, S3, IAM), Docker, Kubernetes, CI/CD, DagsHub, MLflow, GitHub Actions, Containerization, Model Deployment, Render

PROJECTS

GemForecast AI – End-to-End Machine Learning Project | June–July 2026 | [Website](#)

Tools: Automated ML Pipelines with Python | MLOps & Model Deployment | Flask | Docker | CI/CD | Azure | Git/GitHub

- Architected a production-grade, end-to-end Machine Learning automation pipeline in Python, orchestrating 4 modular components—Data Ingestion, Feature Engineering, Model Selection, and Inference—to automate 100% of the ML lifecycle from raw data processing to deployment-ready predictions
- Engineered a high-fidelity feature engineering framework across 9 predictive attributes, integrating ordinal-aware encoding, statistical imputation, feature standardization, and automated preprocessing to construct a regression-optimized learning space while preserving feature semantics.
- Developed and deployed a Flask-powered prediction application by integrating the serialized preprocessing pipeline and the optimal regression model, enabling real-time diamond price estimation through a scalable, inference-ready web interface following automated evaluation of 4 regression algorithms using R^2 , MAE, MSE, and RMSE.

ChurnPulse : Customer Retention Signal Intelligence | Data Analysis Project | May–June 2026

Tools: Scikit-learn, Train-Test Split, StandardScaler, OrdinalEncoding, OneHotEncoding, Feature Engineering, Statistics, Regression, classification

- Analyzed 7,043 customer records and established an overall churn baseline of 26.5%, using it as a benchmark to compare customer segments and identify high-risk churn patterns
- Identified that senior citizens showed nearly 41% churn, around 14.5 percentage points above the baseline (25.6%)
- Identified fiber optic users had 41.9% churn, nearly 15.4 points above baseline, indicating possible service or pricing-related churn risk
- Observed 42% churn among customers without online security, highlighting security add-ons as a key retention opportunity.

Contractual Work & Internship Experience

AI-Driven Business Analytics & Innovation Intern – Saraswati Sales | AnayaBree | GSTIN : 03AAPPV4098J1Z0 | June-Aug

- Collaborating with AI/WhatsApp automation platforms such as AiSensy to design technology-enabled workflows for distributor follow-ups, order updates, stock communication, payment reminders, and customer engagement.
- Building AI-assisted workflow automation using n8n for distributor analytics, tracking, order follow-ups, payment updates, and stock monitoring
- [Click here to view internship offer letter.](#)

Contractual Data Analytics – Old Batra Lemon | Sonipat | March-June

- Leveraged shop-wise and location-wise sales data across 14 franchise leads to identify high-demand markets, top-performing outlets, retailer preferences, and distribution expansion opportunities.
- Evaluated UI/UX workflows and user engagement patterns across the franchise website to identify navigation bottlenecks, optimize conversion touchpoints, and recommend data-driven improvements for maximizing franchise enquiries, user reach, and business conversion.

Avnesh National Level Exhibition – NIFTEM | Old Batra Lemon | Feb 26–28, 2026

- Represented Old Batra Lemon as a [Field Research & Brand Engagement Associate](#) at the Avnesh National Level Exhibition, NIFTEM, conducting real-time customer interaction and feedback analysis in a competitive FMCG environment alongside brands such as Nestlé, PepsiCo, and Tata

EDUCATION, SCHOLARSHIP & CERTIFICATIONS

B.Tech – Computer Science & Engineering

Specialization: AI & Data Science

Kurukshetra University | 2023–2027

CGPA: 7.8 | Class 10: 85.8% | Class 12: 85.6%

[Awarded 100% Tuition Fee Waiver Scholarship through HSTES based on academic merit.](#)

Certifications / Virtual Experience

- [HackerRank MySQL Certification](#) (Intermediate).
- [Data Science Certification](#) – iNeuron + PW Skills
- [Certification](#) – House Price Prediction using Python
- [HackerRank MySQL Certification \(Basic\)](#)
